

CORING

the core of meeting

CORING is not just another touch-screen table

it's unique design, technology integration and best of their class components consist CORING
one-of-a-kind

CORING aims to redefine business meetings with its customizability into a more creative and
[interactive experience!](#)

CORING - a.k.a. Communication Ring - is the first mid-sized furniture family of ubisapdesign studio. We want to create an exceptional experience of business communication, providing functional versatility, technological potential and modern aesthetics in one piece of "new" furniture - one that would enhance communication in every aspect through it's unique characteristics.

HIGHLIGHTS

accommodation for up to six(6) people allowing for equal interaction with the touch-screen table, thanks to its rotating system

plug&play connectable barebone touch-screen table with almost any device-PC even during the same meeting

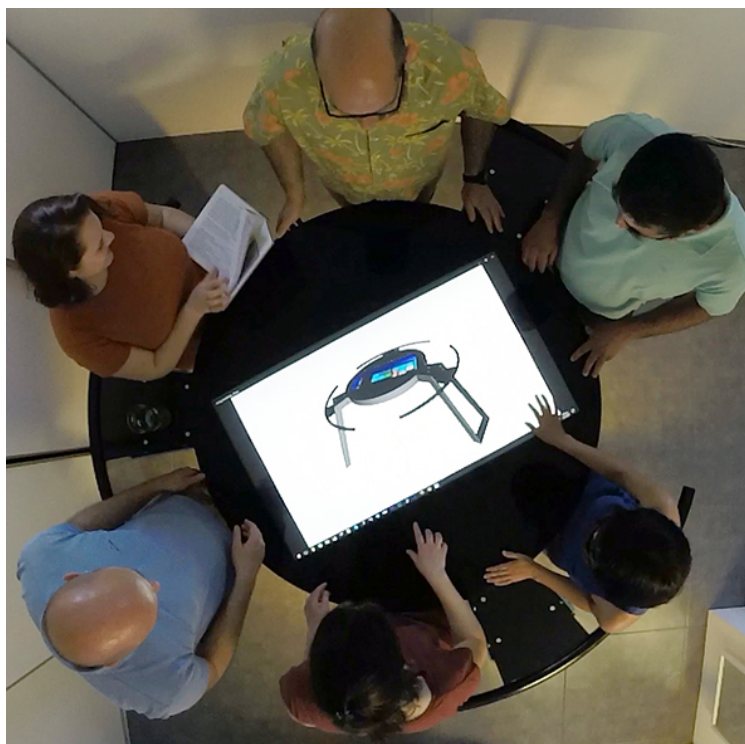

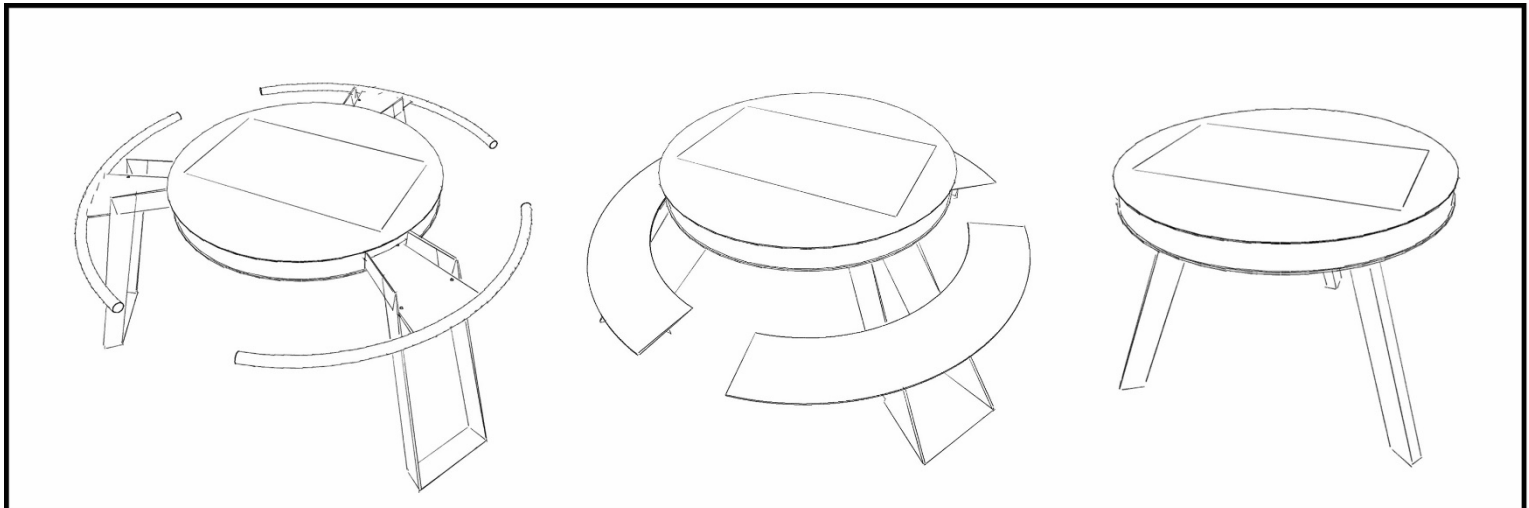

uniquely designed interactive furniture family with four(4) color options

CNC cut and handmade metal structure with easy on-site assembly

exceptional components for the touch system and the cover top glass

detachable standing or sitting support following the overall furniture design aesthetics

CORING family consists of a rotating touch-screen tabletop-system and a variety of different leg types, which can be combined with a couple of extra additives, that can make the following CORING's three variations: "CORING stand"- "CORING table"- "CORING simple"

CORING is inspired, designed and produced by the Greek design studio [ubisapdesign](http://ubisapdesign.com), a studio established in 2009 by civil engineer (MSc in interactive products and systems design) Athanasios Kyratzis. The main activities of the office include residential and tourist's accommodation architecture, interior and product design. The holistic approach of design methods combined with the use of new technologies and materials consist follow up the principal philosophy of the office.
